Education

University of California, Santa Cruz 2014 — 2019
PhD; Astrophysics with an Emphasis in Statistics (*GPA*: 4.0/4.0)

Selected coursework: Advanced Machine Learning (Winter 2018), Bayesian Statistical Modeling (Spring 2016), High Performance Computing (Spring 2015)

Massachusetts Institute of Technology 2010 — 2014
BS; Physics (*GPA:* 4.9/5.0)

Work Experience

Microsoft — Search, Ads, Shopping 2019 —
Data & Applied Scientist

- Built a deep neural network combining text, images and attribute graphs into a single embedding powering shopping recommendations (Python, tensorflow) 2020
- Created a boosted decision tree model predicting whether an ad will be clicked 2019

UCSC Astronomy & Astrophysics 2014 — 2019
NSF Graduate Research Fellow

- Designed conditional Generative Adversarial Networks (cGANs) that create new galaxy images to augment training of neural nets (Python, tensorflow) 2018
- Built image classifier using Convolutional Neural Networks and Random Forests to identify rare dwarf galaxies (Python, keras, scikit-learn) 2017
- Extended distributed software for 3D supernova simulations (C, C++) that scales well to at least 1000 CPUs and ran it for over 250,000 CPU hours. 2016
  Published detailed analysis of a few key simulations ran by this code. 2018
- Published Bayesian statistical analysis of hundreds of supernova simulations 2016

Microsoft Summer 2018
Data Science Intern

- Built clustering models on top of deep representations to identify structure in the differences between natural language corpora (Python, tensorflow)
- Designed online, unsupervised anomaly detection models (Python)

LendUp (consumer lending startup) Summer 2017
Data Science Intern

- Predicted risk of credit card applicants using statistical modeling (Python, SQL)
- Engineered new features to extract insights from previously unused data
- Performed exploratory data analysis to support new product development

MIT Kavli Institute for Astrophysics 2013 — 2014
Undergraduate Researcher

- Discovered and published faint signals of a galactic jet in noisy imaging data (Python)

Tools

Python, tensorflow, keras, pytorch, scikit-learn, C++/C, SQL

Selected Awards

NSF Graduate Research Fellow 2016 — 2019
- $138,000 award supporting my PhD research; 2,000 fellows selected from 17,000 applicants

Osterbrock Prize Leadership Fellow (UC Santa Cruz) 2015 — 2018
- $5,000 award with continued mentoring to develop technical leadership skills
